  by Luis Fernando García, Mariángelas Lacava & Carmen Viera .................................................. 199

- **Instructions to Authors** ........................................................................................................... 202

### Note from the Editors

Participants in the 19th International Congress of Arachnology submitted only nine manuscripts for possible inclusion in this proceedings issue of the *Journal of Arachnology*. By comparison, that is less than a sixth of the number (62) that were submitted after the 17th ICA in Brazil in 2007 and a quarter of the number (36) that were submitted after the 18th ICA in Poland in 2010.

The other papers in this issue (below) were received by the journal as non-ICA submissions.
